

Jordan Hindo

AI Agent Developer & LLM Application Engineer

Projects & Experience

Independent AI Engineer & Researcher

Self-Employed

Jan 2023 - Present

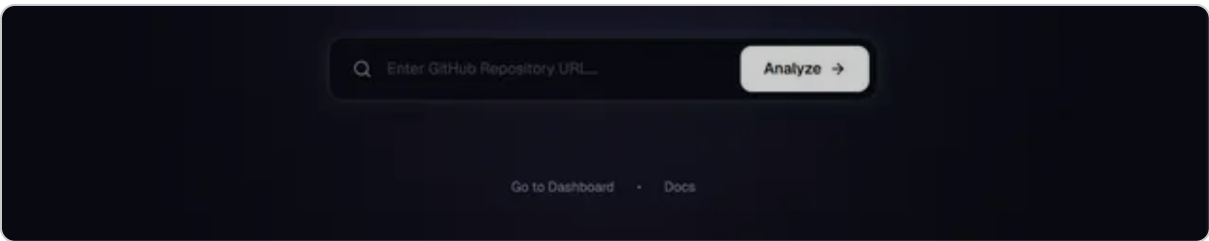

Architecting and shipping production-grade agentic systems. specialized in Model Context Protocol (MCP)infrastructure, multi-agent orchestration, and privacy-first AI architectures.

Catwalk

Infrastructure Engineer

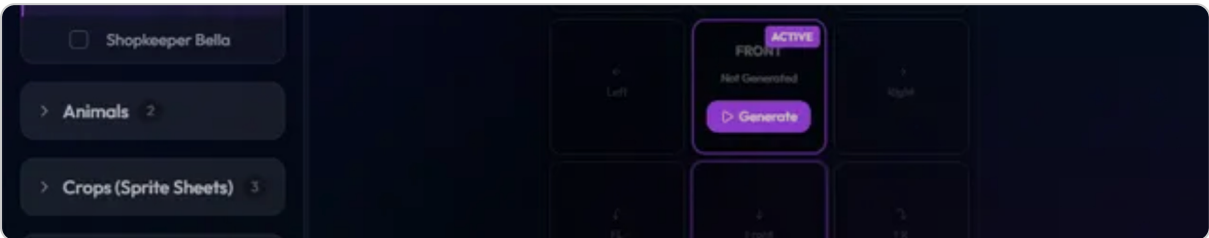

Built a serverless deployment platform for MCP servers. Engineered a custom stdio-to-HTTP bridge implementing the June 2025 MCP Streamable HTTPspec, enabling local agents to securely access remote tools. Implemented a security sandbox to validate AI-generated package imports against npm/PyPI registries to prevent supply-chain attacks.

Lead Architect

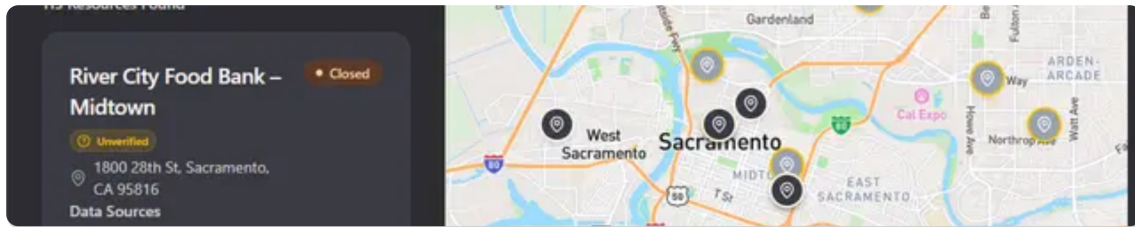

Designed a hybrid persistence engine using Client-side IndexedDB (Dexie)for zero-latency UI state and Server-side Postgres (Prisma)for data durability. Implemented a Privacy-First 'Bring Your Own Key' (BYOK)architecture, ensuring sensitive inference data never touches intermediate servers. Orchestrated a multi-agent loop that shipped 30,000 lines of type-safe code in 11days.
